About Us

History Of Sitoplast

Sitoplast was established in back 1988, as a private ownership with a smaller capital and two employers.

The production started with just one Sohn flexo machine for making simple labels packaging in a little production space in the village of Ratkovo, central Vojvodina, a main agricultural area of Serbia.

Understanding the huge potential of the uprising industries in the region and the expanding need of product marketing and presentation, Sitoplast dedicated itself in the following 30 years to develop its manufacture of packaging materials for the everyday needs...

Where We Are Today

Today Sitoplast is one of the leaders in Serbia in the production of packaging and labels for the meat, dairy, chocolate, pharmaceutical and automotive industries.

Our production site has grew by three times over last five years to reach a space of 3000 m² where we have installed 22 machines of different purposes essential for a full range of packaging solutions tailor made to every branch of industry.

From year to year, our references are rapidly expanding among the packaging industry business to reach more than 300 satisfied customers in Serbia and Europe. The company is represented by a professional team of designers, technicians, sales managers and we strive to invest in their knowledge every year.

Our goal

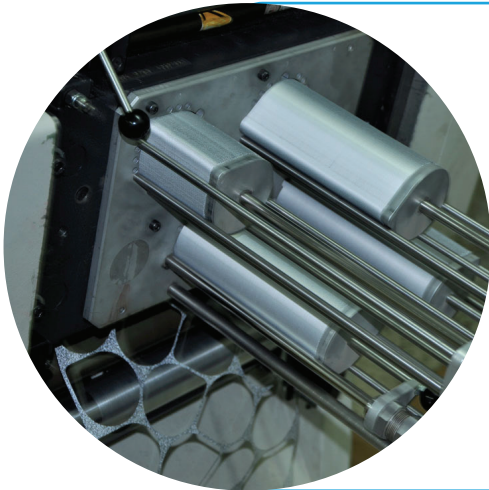

Sitoplast is a healthy and and developing company with its own capital. Every year we set company internal goals high which we are able to reach by our quality of delivered material, stability of production, and constant investments that enable us to keep up to date with the most recent trends in packaging industry.

In the following years among our main goals are:

- increasing capacity by new investments in our production facilities
- developing new export markets such as Russia, North Africa and Middle East
- widening our product range by the most up- to date technologies.

We value every customer and maintaining good partnership relations is a key source of constant success.

Machines

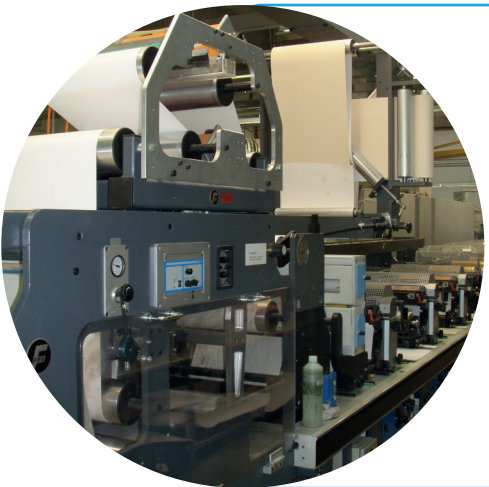

Lids punching machine

Width: 330mm

Speed: 250pcs/min

Material: Al and PET

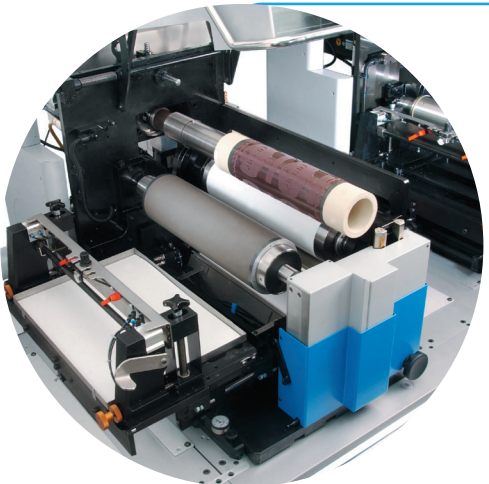

Cardboard printing inline machine

Width: 410mm

Speed: 200m/min

Cardboard: 120 - 450 gsm

Number of colours: 8

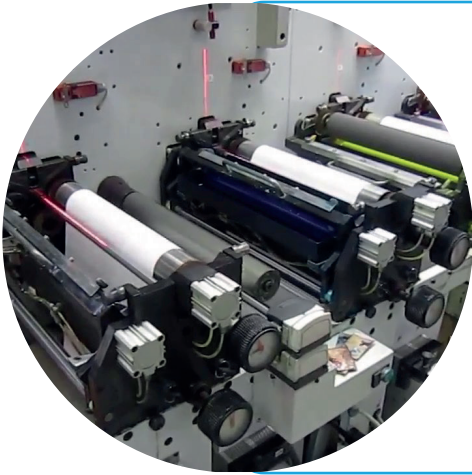

Foil printing machine

Width: 510mm

Speed: 300m/min

Foil material: BOPP, OPP, PET, Al

Number of colours: 7

Label printing machine
Width: 370mm
Speed: 200m/min
Material: adhesive paper

Extrusion LDPE and HDPE
Width: 1200mm
Capacity: 250kg/h
Thickness: 0,006 - 0,3 mic
Corona treatment

Solventless lamination machine
Width: 1300mm
Speed: 400m/min
Foil material: BOPP, OPP, PET,
PE and PAP

Slitting machine
Width: 1300mm
Speed: 400m/min
Material: foil and paper
Thickness: 10mic - 450gsm

We are a company that follows the trends of standardization and quality control of our products.

In our system we manage ISO 9001 and HACCP quality standards

In addition to control in the system, we also have support at the state institute for quality control that certifies the certificate.

We will continue to keep our products safe for our customers.
